

## Relations with Shareholders and Investors

We are committed to fair, timely and appropriate disclosure of information to our shareholders and investors.

### IR activity policy

We provide necessary information through a timely disclosure system and our website. In addition, we strive to enhance communication through various briefings and facility tours for shareholders, institutional investors and analysts. We are actively working to make ourselves understood by them more deeply.

Dividend					•Payment of year-end dividend				•Payment of interim dividend			
Shareholders meeting					•General shareholders meeting							
Facility tours					•Facility tour (for individual shareholders)							•Facility tour (for institutional investors and analysts)

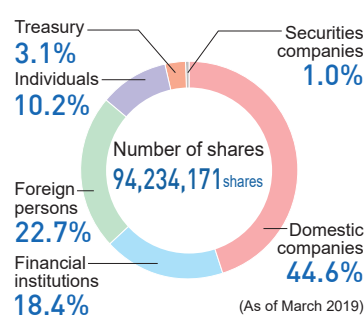

### Measures for return to shareholders

The Company regards the interest of shareholders as an important management policy, and has a basic dividend policy of determining the amount of dividends by comprehensively considering business performance, etc. as well as a target dividend payout ratio of 30% as a guide, while striving to maintain stable dividend payment.

We give first priority to paying dividends as a measure for return to shareholders, and have made it our basic principle to return the surplus through two dividends: an interim dividend and a year-end dividend.

As of the end of March 2019, we have set the annual dividend to ¥64 per share.

#### Status of distribution of shares, by holder

#### Dividend per share

### Communication with investors

We hold financial results briefings for institutional investors and analysts twice a year to report on our work with regard to improving business performance and quality, and our work on the development of new products for the future.

In addition, we conducted a facility tour in December 2018, for which we invited institutional investors and analysts to our company. They confirmed our initiatives for semiconductors in which direction our development is headed.
