TOKAI RIKA Receives A- Rating for its Responses to the CDP Climate Change and Water Security Questionnaires

TOKAI RIKA CO., LTD. (Head Office: Oguchi-cho, Niwa-gun, Aichi, Japan, President: Hiroyoshi Ninoyu) has received an A- rating for its responses to the climate change and water security questionnaires provided by CDP, a global non-profit that runs the world's only independent environmental disclosure system for companies. This is the first time that TOKAI RIKA has received an A- rating for its responses under both of these themes.

Founded in the UK in 2000, CDP is a non-governmental organization (NGO) that rates and discloses information about the environmental initiatives of companies and regional governments. In 2024, more than 24,800 companies (representing two-thirds of global market capitalization) disclosed information about their environmental initiatives by responding to the questionnaires provided by CDP. Responses to these questionnaires are rated along an 8-point scale (A, A-, B, B-, C, C-, D, and D-). An A- rating is awarded to companies demonstrating best practices and strategies that distinguish them as leaders in environmental actions.

TOKAI RIKA is aiming to reduce its real CO_2 emissions to zero by the year 2050. We formulated the Carbon-neutral Strategy 2030 to define various milestones toward achieving this target, and are implementing a wide range of initiatives across the whole life cycle based on four strategies for products, production, purchasing, and logistics. To help achieve the objectives of the Carbon-neutral Strategy 2030, we have also introduced the 7th Environmental Action Plan that sets short-term targets for CO_2 emissions, water intake, and similar metrics. TOKAI RIKA is making comprehensive efforts to achieve these targets.

In the future, we intend to continue promoting environmentally friendly business practices to help realize a sustainable society.
