## Lights on

## Summary

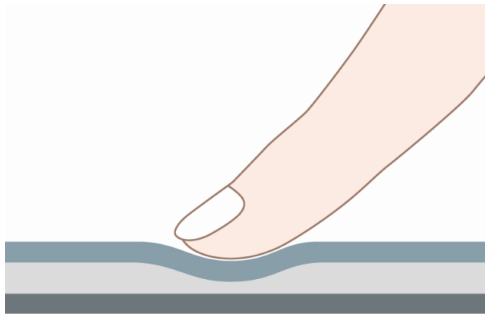

Fusion of switches and the decorative interior panel.

Tokai Rika's proven operating feel thrives in the quality aesthetic design.

### Soft

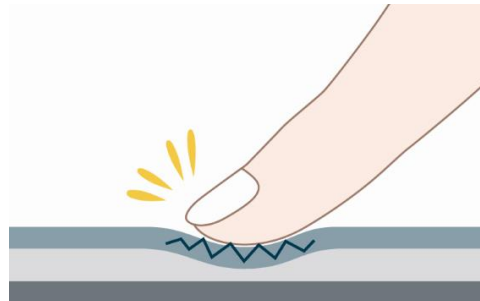

Switches are integrated into soft interior

Cushion structure

### Haptic

Crisp and comfortable operating feel

The panel gives vibrational feedback

### Sustainable

Environmental friendly

Synthetic leather with bamboo powder

# Technology

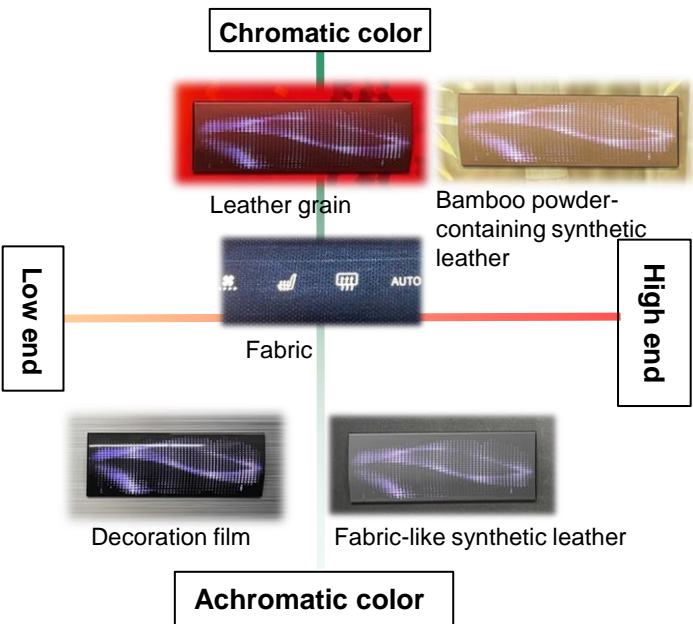

Our decoration technology, haptic technology, and lighting technology are integrated into The Hidden Light Effect.

## Hidden Light Effect

### Decoration technology

#### Abundant decoration variations

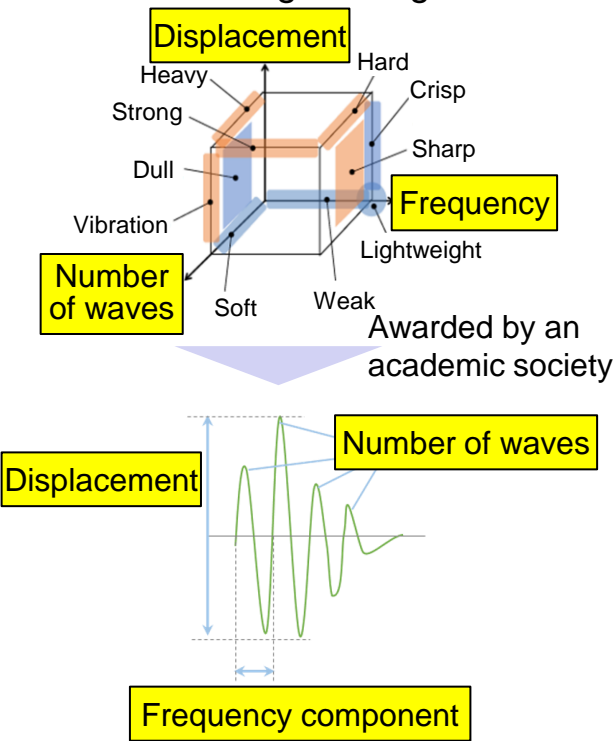

Various materials (color, hardness, and grain) are available

### Haptic technology

#### Comfortable operating feel

The optimally designed actuator generates vibrations that are designed based on *kansei* engineering.

### Lighting technology

#### Clear and vivid symbols

Our original aperture method prevents the illumination from being affected by the color and pattern of the decoration layer.
